Sir:

Response to Restriction/Election Requirement

This paper is being filed in response to the Office Action of June 3, 2005. Claims 1-68 are pending in the present application. Applicants note that the Office Action appears to identify incorrectly the various groups of allegedly distinct invention. However, after careful review of the Office Action and the pending application, it appears as though the intent of the Office Action was to identify the three different embodiments referred to in paragraphs [0003], [0004], and [0006] as patentably distinct species. Further, the electrode configurations of Figs. 2A, 2B, and 2C appear to have been identified as sub-species under these three species. Working under this assumption, application hereby elects the species of paragraph [0003] and the sub-species of Fig. 2A for substantive examination.

Claims 1-37, 39, 43-47, and 64-68 read on the elected species.
